OBJECTIVE

Final-year Computer Science undergraduate (2027) seeking a **Software Engineer / Full Stack Developer** role. Strong fundamentals in Data Structures & Algorithms, OOP, DBMS, and Operating Systems, with hands-on full-stack development across 3+ production-style MERN applications supporting real-time, multi-user functionality, plus AI-powered application development integrating Gemini, Groq, and LLaMA 3.1. Proven ability to design, build, and ship RESTful APIs and database-driven systems independently and in cross-functional teams.

EDUCATION

KSR Institute for Engineering and Technology <i>Bachelor of Engineering in Computer Science and Engineering; CGPA: 8.00/10</i>	Namakkal, India 2023 – 2027
Bharani Park Higher Secondary School <i>Higher Secondary Certificate (Class XII) – Computer Science; Score: 72%</i>	Tamil Nadu, India 2021 – 2023

TECHNICAL SKILLS

Core CS Fundamentals: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, Problem Solving
Programming Languages: Java, Python, C, JavaScript, HTML5, CSS3
AI / LLM Integrations: Gemini API, Groq API, LLaMA 3.1, Prompt Engineering
Web Development: React.js, Node.js, Express.js, RESTful APIs, TailwindCSS, Bootstrap, Socket.IO
Databases: MySQL, MongoDB, PostgreSQL, Mongoose
Tools: Git, GitHub, VS Code, Power BI, Firecrawl, OpenCode
Testing & QA: Android Emulator, Unit Testing, Widget Testing, GTmetrix, Postman, BrowserStack

PROJECTS

Google Docs Clone <i>React.js, Node.js, Express.js, MongoDB, Socket.IO</i>	2025
- Engineered a real-time collaborative document editor enabling concurrent multi-user editing with sub-second sync latency using Socket.IO event broadcasting. - Designed JWT-secured authentication and unique UUID-based document routing; integrated Quill.js rich-text editor with persistent MongoDB storage, reducing document load time through indexed queries.	
LogMonitor – Real-Time Log Monitoring Service <i>Node.js, Express.js, MongoDB, JWT, WebSockets, React</i>	2025
- Built an authenticated real-time log monitoring service streaming live server logs to connected clients via WebSockets, eliminating manual log polling. - Implemented JWT authentication, REST APIs, path-traversal protection, and offset-based log tailing for efficient incremental reads on large log files.	
BuddyBot – AI Conversational Chatbot <i>Python, Streamlit, Groq API (LLaMA 3.1)</i>	2026
- Built and deployed an AI chatbot using Streamlit and Groq’s 8B-parameter LLaMA-3.1-Instant API, engineering a single system prompt to drive a consistent, low-latency Tanglish (Tamil-English) persona. - Designed a custom dark glassmorphism chat UI with session-based conversation history and live typing indicators; deployed and publicly hosted the app on Render.	

PROFESSIONAL EXPERIENCE

Logic Veda Solutions <i>Web Development Intern</i>	Namakkal / Remote 2026
- Built and shipped full-stack features for a real-time collaboration platform using the MERN stack, REST APIs, and WebSockets, following modular, testable development practices. - Partnered with the engineering team on feature implementation, API integration, and debugging, contributing to on-time pre-deployment testing across multiple release cycles.	
ZenteiQ AI HUB <i>Technical Analyst – AI Product</i>	Bangalore 2026
- Built web crawling and data-extraction pipelines using Firecrawl and OpenCode, converting raw HTML into structured Markdown for downstream AI processing. - Developed a Chromium/CDP-based dynamic crawler supporting JavaScript rendering, authenticated sessions, lazy-loaded content, and recursive multi-page crawling.	

CERTIFICATIONS & ACHIEVEMENTS

- HackerRank:** Certified in Java and React (Frontend Developer).
- NPTEL:** Certified in Cloud Computing and Sustainable Happiness.
- Full Stack Certification:** HDfD Full Stack Web Development.
- Community:** Active Member @ Google Developer Groups (GDG), 2024.

LANGUAGES

- English:** Professional working proficiency.
- Tamil:** Native proficiency.
